Download and installation of METERTOOL/LogView

(Shown for Windows 7. Similar for other operating systems)

- Turn on the PC where METERTOOL/LogView is to be installed (must have an internet connection)
- Start up Internet Explorer (alt. Firefox)
- Insert the following link in Internet explorer's address field: ftp://ftp.kamstrup.dk
- Following windows is shown:

ſ	Internet E	xplorer	×	
	To log on to this FTP server, type a user name and password.			
		FTP server:	ftp.kamstrup.dk	
		User name:		
I		Password:		
	After you log on, you can add this server to your Favorites and return to it			
		Log on anon	ymously	
			Log on Cancel	

- Enter the given user name.
- Enter the given "Password"
- Click "Log on"
- The following is shown on the screen:

 Choose the Kamstrup Water- or Heat/Cooling meter for which you want to download METERTOOL and/or LogView eg. METERTOOL for MULTICAL[®] 21.

• The window shown below appears.

- Click on either METERTOOL or LogView depending on which software you wish to download. In this case METERTOOL is chosen.
- The following window is shown in the bottom of the screen (MULTICAL® 21 shown):

• Click the arrow next to the Save-button and chose the "Save as" option:

• Click on "Local Disk (C:)" and thereafter on "Save" in the lower part of the window.

• The following window is shown in the bottom of the screen:

• Click on "Open folder" and the window below is shown, with the actual file marked with blue background:

Right-click on the marked file and choose "Extract to here" as shown below

• After the file extraction, that was executed above, this picture is shown:

• Now, open the newly created folder (*MULTICAL® 21 shown*) "66-99-714 METERTOOL MC21 Rev." which can be seen in the lower part of the picture and the following is shown (similar for LogView):

🚱 🔵 🖉 🕌 🕨 Computer 🕨 Local Disk (C:) 🕨 66-99-714 METERTOOL MC21 Rev. F1 - V1.0.0.0 🕨
